**RE: RCRA Facility Investigation/Corrective Measure Study Work Plan, Area of Concern E, Moral, Welfare, and Recreation Department Equipment Storage Area, Naval Station Mayport, USEPA ID #FL9 170 024 260, Mayport, Florida, (Tetra Tech NUS, Inc., July 2009)**

Dear Mr. Syme:

I have completed my review of the subject document which was dated July 2009 and was received on July 24, 2009. This work plan is designed to guide soil and groundwater investigations and the completion of the Resource Conservation and Recovery Act (RCRA) Facility Investigation (RFI) and Corrective Measures Study (CMS) reports for the site recognized as Area of Concern (AOC) E. Recently, I had reviewed and commented on the Draft version of this document (Tetra Tech NUS, June 2009) and concurred with the work plan's scope and approach. The final document has not changed compared to the draft version, so FDEP concurs with the planned sampling activities described in this final RFI/CMS Work Plan. Please remember, following the soil and groundwater sampling events, an RFI Report should be prepared. Also, following the concurrence of the final RFI Report, a CMS Report should be prepared to identify, screen, and evaluate corrective measure alternatives for all media at AOC E.

Thank you for the opportunity to review this document. If you require additional clarification or other assistance, please feel free to contact me at 850/245-8999.

Sincerely,

John Winters, P.G.  
Remedial Project Manager

JJC ESN
